Enzo.

Enzo is a refined contemporary lounge chair that balances sculptural elegance with everyday usability.

Defined by its delicate curves, sleek lines, and distinctive silhouette, it brings a strong visual presence while maintaining a sense of lightness and restraint. The carefully contoured seat and supportive form create a natural, relaxed sitting position, making it equally suited to extended periods of comfort or shorter, more informal interactions.

Designed with versatility in mind, Enzo transitions effortlessly between environments. Whether placed in a welcoming waiting area, a sophisticated boardroom, or a collaborative workspace, it enhances its surroundings without overwhelming them.

Three thoughtfully considered base options allow for subtle variation in character and function, while a wide range of upholstery choices enables complete customization to suit different interior schemes and brand identities.

Every element of Enzo has been designed with intention, ensuring that comfort, durability, and aesthetic appeal work in harmony. Its understated yet confident design avoids unnecessary complexity, focusing instead on clean lines and balanced proportions.

Elegant, adaptable, and inviting, Enzo is a lounge chair that responds seamlessly to the evolving needs of modern interiors, supporting both work and relaxation with equal ease.

Design

Enzo is the result of months of research. We searched the market to find what was missing and where a gap could be filled. We eventually decided boardroom comfort was an area within which something was missing so we endeavoured to fill that space with a new, innovative solution.

Construct

A robust frame construction adorned with high-grade foam, and formed to maximise ergonomics and comfort, paired with the right bases make for a truly exceptional seat that make long waiting times or board-meetings a lot less difficult.

Finish

We decided to limit the number of base options for Enzo to ensure maximum versatility and function. Just three bases, paired with a full complement of potential upholstered finishes offer a world of uses.
